

What do you know about

INCANDESCENT

Low Energy Efficiency

Cost Per Bulb: \$0.50

Lifespan of 1kWh: 16.7 hours

1 Year

FLUORESCENT

Moderate Energy Efficiency

Cost Per Bulb: \$4.00

Lifespan of 1kWh: 76.9 hours

6-10 Years

LED

High Energy Efficiency

Cost Per Bulb: \$15.00

Lifespan of 1kWh: 133.3 hours

15-25 Years

CFL Bulbs Contain Mercury!

By absorbing mercury, you are exposing yourself to health risks:

Nervous Disorders

Kidney Damage

Even Death!

Causes Cancer

Respiratory Failure

What is a CFL Bulb?

It is a compact fluorescent light, designed to replace an incandescent lamp.

If broken, CFL bulbs pose serious environmental threat!

Please do not dispose of CFL Bulbs in the garbage!

The amount of mercury in 1 bulb may not be critical, but in bulk it is HARMFUL!
